

STUCCO & EIFS INDUSTRY

► Bringing Innovation to the Way You Work

In today's market, the demand for new construction as well as repairing older infrastructure is increasing. With more stringent building codes being set, architects and builders are looking for more resilient structures that are efficient.

STUCCO

For stucco applications, the ToughTek S340e Stucco Pump handles scratch coat, brown coat and finish coat.

EIFS

For EIFS applications (Exterior Insulation and Finish System), the ToughTek S340e Stucco Pump handles air/water-resistive barriers, EIFS base coat and finish coat.

► **Boost Your Productivity**

To meet this growing demand, your business needs to get more jobs done in the same amount of time. Adding and training new skilled team members will increase what you can get done, but will not improve cost per square foot. The next step is looking for efficiencies in your operations and one place to improve is moving away from hand troweling stucco and EIFS materials.

Simple application for high quality results

By investing in Graco's ToughTek stucco pumps, one crew is able to get twice as much done. In addition, spraying stucco and EIFS provides a more consistent finish by guaranteeing that you are able to fill in the metal lath without gaps or air pockets. The finished result is higher quality stucco application from a machine that is simple to use, clean and maintain.

▶ Select the Right Graco Option for Your Business

Graco offers two types of pumps – **piston and rotor stator** – to help your business get stucco and EIFS up tall buildings, around large job sites and inside tight spots.

Piston Pump

Graco's piston pump technology moves material by moving the pump up and down. For the majority of jobs, Graco's piston pump technology meets performance standards and is not only easy to maintain, but works with any 120 volt outlet.

Rotor Stator Pump

Graco's rotor stator pump technology moves material by rotating the pump in a circular fashion. For larger jobs that require thicker materials, a powerful rotor stator pump will give you the durability and rugged performance needed to get the job done quickly and efficiently.

► Stucco and EIFS Product Line

Select the right pump for your business.

ToughTek® S340e

Engineered with Graco's proprietary piston pump technology, the ToughTek S340e can easily handle everything from heavy, abrasive scratch and brown stucco base coats to EIFS base and finish coats. The S340e can also deliver all materials through long hose lengths, allowing you to spray farther distances and get the job done sooner.

PISTON PUMP

ToughTek P20

The smallest of the three P Series pumps, the ToughTek P20 is ideal for medium sized plaster applications as well as small jobs like pointing, or filling, the spaces between stone or grout. Because it is built with a rotor stator motor, this pump provides long-lasting durability and rugged performance for even the thickest mortar materials. In addition, its compact design and light weight make it easy to transport and use on the jobsite.

ROTOR STATOR PUMP

ToughTek P30HT

If you like the compact size of the P20 rotor stator pump, but are looking for more output, the ToughTek P30HT is the perfect fit for your business. Upgrade to this pump if you plan to use epoxy-based mortars (or other thick high-viscosity materials) or plan to spray taller buildings, such as sport stadiums, high-rises, apartment complexes, hospitals or parking garages to name a few.

ROTOR STATOR PUMP

ToughTek P30X-HT

The ToughTek P30X-HT is perfect for contractors who are looking for versatility and features for medium to large stucco and EIFS projects. The P30X-HT has a large 60-gallon (227 liter) hopper and offers superior performance for a variety of stucco and EIFS materials.

ROTOR STATOR PUMP

ToughTek P40

Known as the workhorse because of its 600 psi output pressure, the ToughTek P40 is built for high volume applications. The high flow rate and high pressure allows contractors to pump stucco and EIFS up a tall building while keeping the pump on the ground, saving your operation time.

ROTOR STATOR PUMP

Visit www.graco.com/toughtek for more detailed information 

► ToughTek S340e Piston Pump

The compact design and small footprint of the S340e makes it easy to transport into a jobsite and fit into tight spaces so you can spray with ease. Switch from the traditional hawk and trowel method to this light weight pump and start increasing your profits by reducing time spent on your next job.

Low Power Requirements

- Plugs into standard 120V wall outlet
- No electrician or rewiring needed

Compact and Portable

- Easy to move

Easy to Clean Hopper

- Rugged polyethylene construction
- 20 gal (76 L) capacity

Brushless Direct Drive Electric Motor

- No maintenance and longer life

Quick-knockdown Pump Lower

- Designed to pump stucco and EIFS materials
- Fast and easy maintenance

Variable Speed

- Dial in the exact speed needed, from low to high volume output

Optional Remote On/Off Switch

- Start or stop the pump at the applicator

Tool-less Hopper Removal

- Disconnects in seconds to clean

► ToughTek P30HT Rotor Stator Pump

The ToughTek P30HT, along with all of the rotor stator pumps, is engineered with the latest rotor stator pump technology and can handle the heavier base coats that need to move through longer distances of hose. This allows you to spray farther distances to get the job done sooner.

Variable Frequency Drive

- Protects your investment – provides auto shutdown in case of power spikes

Simple Controls

- Easy dial control for desired output

Feed Grate

- Impedes entry of large foreign objects to minimize downtime

Reversible Drive

- Easily change pump direction to relieve fluid pressure and pack-outs

Wedge Pins

- Easy removal of motor/gearbox and pump for improved portability

Adjustable Stator

- Extends the life of the stator sleeve
- Adjust output pressure, as desired

► Higher Production with a Serious Mixer

With a ToughTek Continuous Mixer, it's easy to improve your crew's production rates by automatically mixing pre-blended mortar products such as EIFS, plaster, stucco, self-leveling underlayments, refractory materials, masonry and grout.

Simply turn the machine on, set the water flow rate for your specific material and break bags of material into the hopper. The system automatically does the rest. A ToughTek Continuous Mixer eliminates the need to manually measure water into the mix, which takes time and doesn't always produce consistent results day to day.

Compact and Portable

- Weighs only 210 lbs
- Easy to move

Large Capacity Hopper with Bag Breaker

- Ideal for large projects
- Output – up to 40 bags / hour

Quick-knockdown Mixing Section

- Tool-less clamp for ease of assembly and disassembly
- Easy to clean and maintain

Simple Controls

- Easy to use on/off toggle switch

Water Flow Valve

- Set and adjust water flow
- Eliminates the need to measure water

Low Power Requirements

- Plugs into standard 120V wall outlet
- No electrician or rewiring needed

Graco Has You Covered

Facilities Worldwide for Global Support

Quality First

At Graco we pride ourselves on providing best-in-class products. Engineered solutions are manufactured in our own facilities, with the highest standards in the industry. We provide you with world-class customer support and expertise to help solve your application challenges.

Global Reach

Graco has facilities across the globe to provide you with the products and service you need, where you live. Plus, Graco has dedicated field experts in all areas of the world to support the products we sell.

Product Capabilities

Graco has a broad range of products that are engineered and tested to perform in the harshest environments so you can be certain your equipment is protected and working at peak performance.
